

MPLIFY SASE CERTIFICATION FOR SERVICE PROVIDERS

A streamlined inheritance-based path for service providers to certify SASE services using eligible certified technology provider solutions.

WHY CERTIFICATION MATTERS

REDUCED IN-HOUSE TECHNOLOGY TESTING

Service providers procure certified technology.

NO LIVE NETWORK TESTING

Service providers inherit the technology certification, Mplify validates eligibility.

MULTI-VENDOR SUPPORT

Inherit from one or more certified technology providers to support multi-vendor services.

MARKET VISIBILITY

Certification marks, public registry listing, and promotion across Mplify channels.

NAAS SECURITY POSITION

Strengthen your standing in Mplify's growing secure NaaS and NaaS for AI ecosystem.

WHAT CAN BE CERTIFIED?

3 certified technology provider certifications are eligible for SASE inheritance.

SD-WAN

SSE

ZERO TRUST

FULL SASE = SD-WAN + SSE + ZERO TRUST

Technology provider testing is performed in the technology provider environment; service providers inherit those results with no additional testing.

Technology certification testing provided by SecureIQLab

HOW IT WORKS

Four steps from engagement to published certification.

1

REQUEST

Engage Mplify

2

DECLARE

Complete inheritance questionnaire

3

VALIDATE

Mplify confirms eligibility

4

CERTIFY

Service certification published in public registry

NO ADDITIONAL SERVICE PROVIDER TESTING REQUIRED

BUILT ON OPEN STANDARDS

Mplify SASE certifications are grounded in open, industry-defined standards.

SASE

MEF 117.x

SSE

MEF 169
MEF W162.x
MEF 138

ZERO TRUST

MEF 118.x
MEF W163.x

SD-WAN

MEF 70.x
MEF 119
MEF W90.x

INVESTMENT & VALUE

Service provider inheritance fees — maintained at no additional cost while annual Mplify membership stays active. *All prices USD.*

\$15K
